**DETAILED ACTION**

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 12, 5-11, 14-120, 22, 23, drawn to multi-interface, classified in class 370, subclass 389.
  - II. Claims 13, 21, 24, drawn to IPsec layer and MAC layer, classified in class 370, subclass 235.
  - III. Claims 25-26, drawn to WI-FI network and ESSID, classified in class 370, subclass 328
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination group III has separate utility such as WI-FI network and ESSID . See MPEP § 806.05(d).
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. Telephone call was made to Steven Koffs at (215) 979-1000 on 12/08/2006, request an oral election to the above restriction, but did not result in an election being made.

Art Unit: 2617

5 Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
